

Lehigh Carbon Community College

At Lehigh Carbon Community College, students can choose from more than 90 degree and certificate programs in Arts, Communication and Design; Business and Administration; Computer Science and Information Technology; Education and Public Service; Health Care; Manufacturing, Trades and Transportation; and Science and Engineering.

Flexible Options

LCCC offers two-year associate degrees, certificate and specialized diploma programs, and workforce training. The college also has transfer agreements with more than 60 colleges and universities.

To accommodate pandemic restrictions, classes this fall are offered online and remote, with additional select courses offered face-to-face. The college encompasses the main campus in Schnecksville as well as sites in Allentown, Tamaqua, Jim Thorpe, Lehigh Valley International Airport and the Baum School of Art.

Financial aid

The college administers various federal and state financial aid funds: grants that do not require repayment, as well as loans and student employment programs. The LCCC Foundation offers scholarships for qualified students, awarded for academic achievement or financial need.

Internships and career training opportunities

The Career Development Center empowers students to develop career management skills to attain their professional goals. Students benefit from partnerships the college develops with employers, as well as career exploration, experiential learning opportunities and job preparation assistance.

In addition, the center helps students secure internship opportunities that allow them to combine classroom study with on-the-job experience. The college also offers an internship through the Walt Disney World College Program.

Exciting options

In addition to their academic studies, students have the opportunity to develop leadership skills in student government or clubs and organizations. The Honors Scholars Program provides full tuition and fees for students who want a challenging academic experience and plan to pursue a bachelor's degree.

The college is committed to student success, ensuring that a high quality education is affordable and accessible.

At LCCC, students who start here, truly can go anywhere.
